## The Game
Galaxians have no right to your planet, and you're willing to put your life on the line to prove it. Your ship blasts off and before you know it, you're in battle with the evil Galaxian Fleet. An entire battalion of invaders descends toward your planet. Your commando ship suddenly becomes the target of a missile ambush.

*Galaxian* starts each game with three lives. Fly up the screen and destroy anything that threatens your progress. Slide your ship to the left and right and fire your missiles to protect your ship from annihilation. Time your shots carefully, because another missile cannot be fired until the first missile has cleared the screen or hit an alien. The Galaxian Fleet is fast and strong and they have lots of battle experience. Their tactical equipment allows them to dodge your cannon blasts, and their tricks divert your attention. This Galaxian ability to pull off surprises forces you to use foresight and caution. Your cunning and skill are in high demand.
